

Inclusion for children with additional needs and disabilities

Family Advice and Support

Does your child need help at a mainstream activity club?

Do you live in the Boroughs of Wokingham or Reading?

We do not require children to have a formal diagnosis to receive our service, if they need a bit of extra support, we can help!

Who do we support?

Me2 Club support children and teenagers aged 5 to 19, living in Reading and Wokingham, with additional needs and disabilities such as:

- ADHD
- Anxiety
- Autism
- Challenging behaviour
- Down's syndrome
- Global Development Delay
- Speech & Language issues
- As well as a range of other additional needs

What do we offer?

We offer a child with additional needs a matched volunteer buddy who can support them at a mainstream activity once a week.

Families are supported by an Activities and Volunteers Coordinator who gets to know each child and match them with a volunteer. Volunteers and children are matched based on location, activity, personality, needs, experience and other factors.

How can you get help?

The first step to getting support for your child is to complete our registration form.

Once your child comes to the top of our waiting list, a member of staff will be in touch to start the process of finding your child a volunteer.

Finding an activity

We can support children to take part in a range of activities such as uniform groups, swimming lessons, drama classes, sports clubs and more. Parents and carers need to find an activity for their child which is:

- Mainstream and open to all
- On a weekday (Monday-Friday)

Visit our website for more information about activity clubs and support finding a club for your child.
